

Custom Antibody Conjugation Services

Columbia Biosciences - Your Custom Antibody Labeling Expert

Developing a reliable and repeatable conjugation process can be complex and time consuming. Columbia Biosciences experienced and responsive team will help choose the right fluorophore and conjugation chemistry to meet your needs, resulting in a robust and reliable product. Utilizing our team for your next project, whether it's for research or commercial use, will save you and your team time and money.

Advantages of Working with Columbia Biosciences

- Wide selection of labels - including fluorescent dyes, enzymes, proteins, haptens, and PEG
- Flexible - we provide conjugation services for both research and commercial use
- Rapid turnaround time - 5-10 days, depending on quantity; expedited service also available
- Very experienced team - over 20 years of antibody and protein conjugation experience
- Extremely cost effective

We Offer a Wide Range of Fluorophores and Biomolecules

Fluorophores:

- APC
- R-PE
- PerCP
- PerCP Cyanine 5.5
- FITC
- SureLight® 488
- Alexa Fluor® Dyes
- DyLight® Dyes
- Europium/Terbium
- Pacific Blue

Small Molecules:

- Biotin
- DNP
- DIG
- PEG(s)
- MSD Gold™ Sulfo-Tag

Proteins:

- Horseradish Peroxidase (HRP)
- Alkaline Phosphatase (AP)
- Streptavidin
